

MOBILE BAR AND PIPE RACK

Mcrack is the product that you need to quickly transfer heavy pipe materials such as multiple types of rebar and steel pipes from your warehouse to smaller processing shops or areas that are not suitable for forklift access, I believe this mobile cantilever product is the best option. It is designed to provide pipe, tube and bar transfer for pipe processing plants. It provides a greater load capacity than a forklift.

It is designed from the beginning to take into consideration the specific needs of the work scene, the height of the product is close to the height of adults, you can flexibly store and access different lengths of items. It is safe enough, each cantilever is designed of a blocking structure to prevent the fall . It is flexible enough, the biggest advantage of mobile cantilever rack is with universal wheels It can be flexibly to move. At the same time it also has a brake fixing function, you can easily fix the cantilever rack in a position close to your work area, so as to improve work efficiency. We pay attention to the maximum utilization of the product space, so there are cantilevers designed on both sides of the product to improve the storage capacity. This is the optimal choice for the quick turnover of pipe materials in different enclosed workshops.

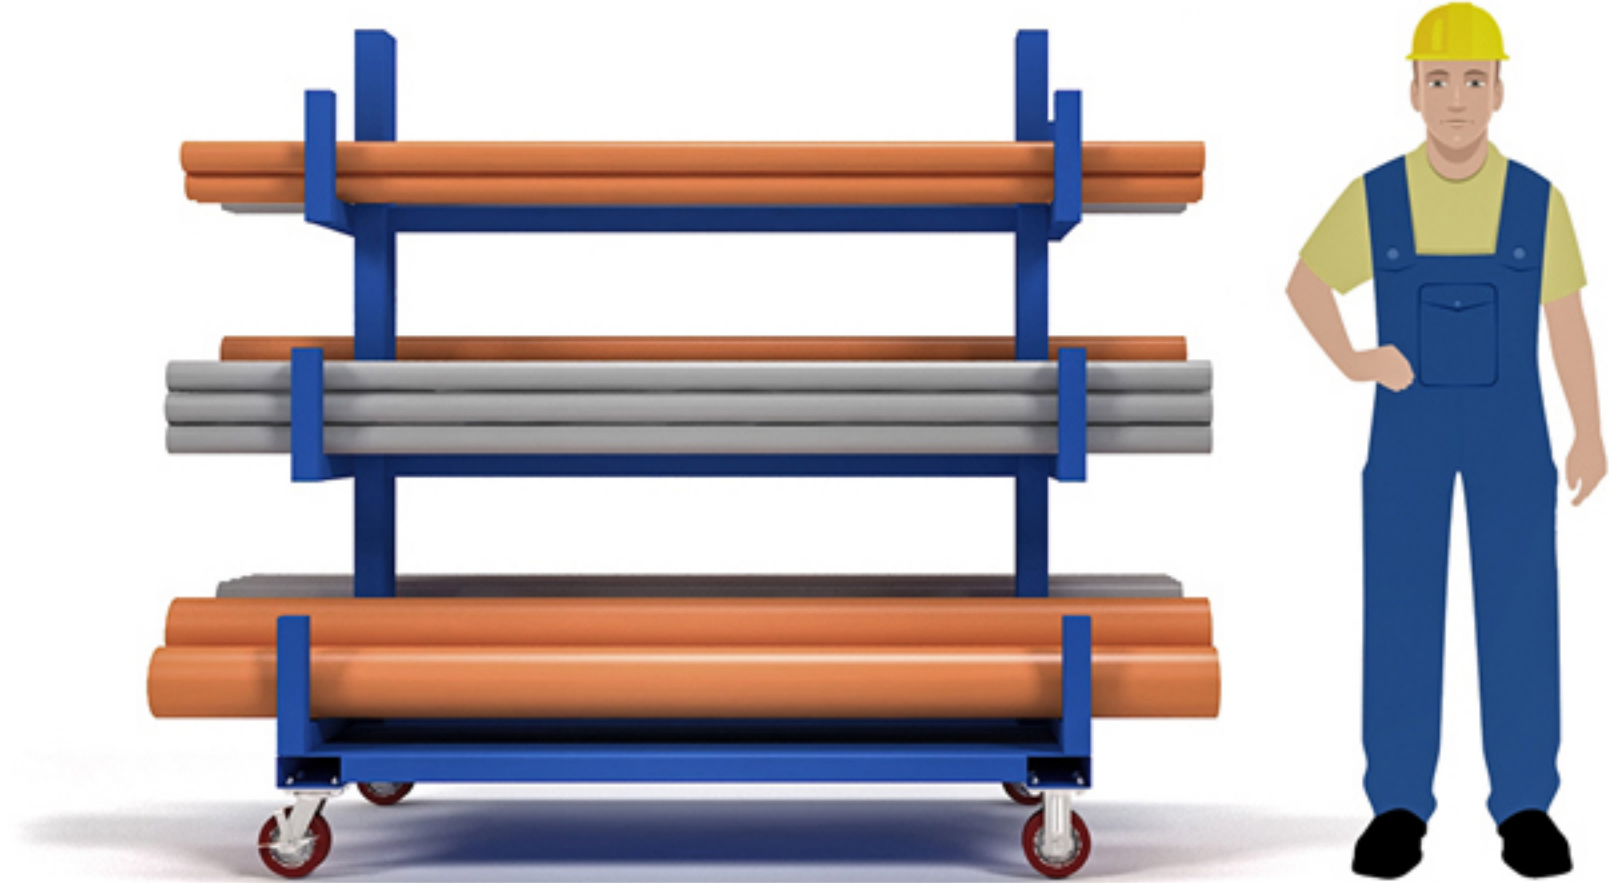

Transfer of pipes, tubes and bars

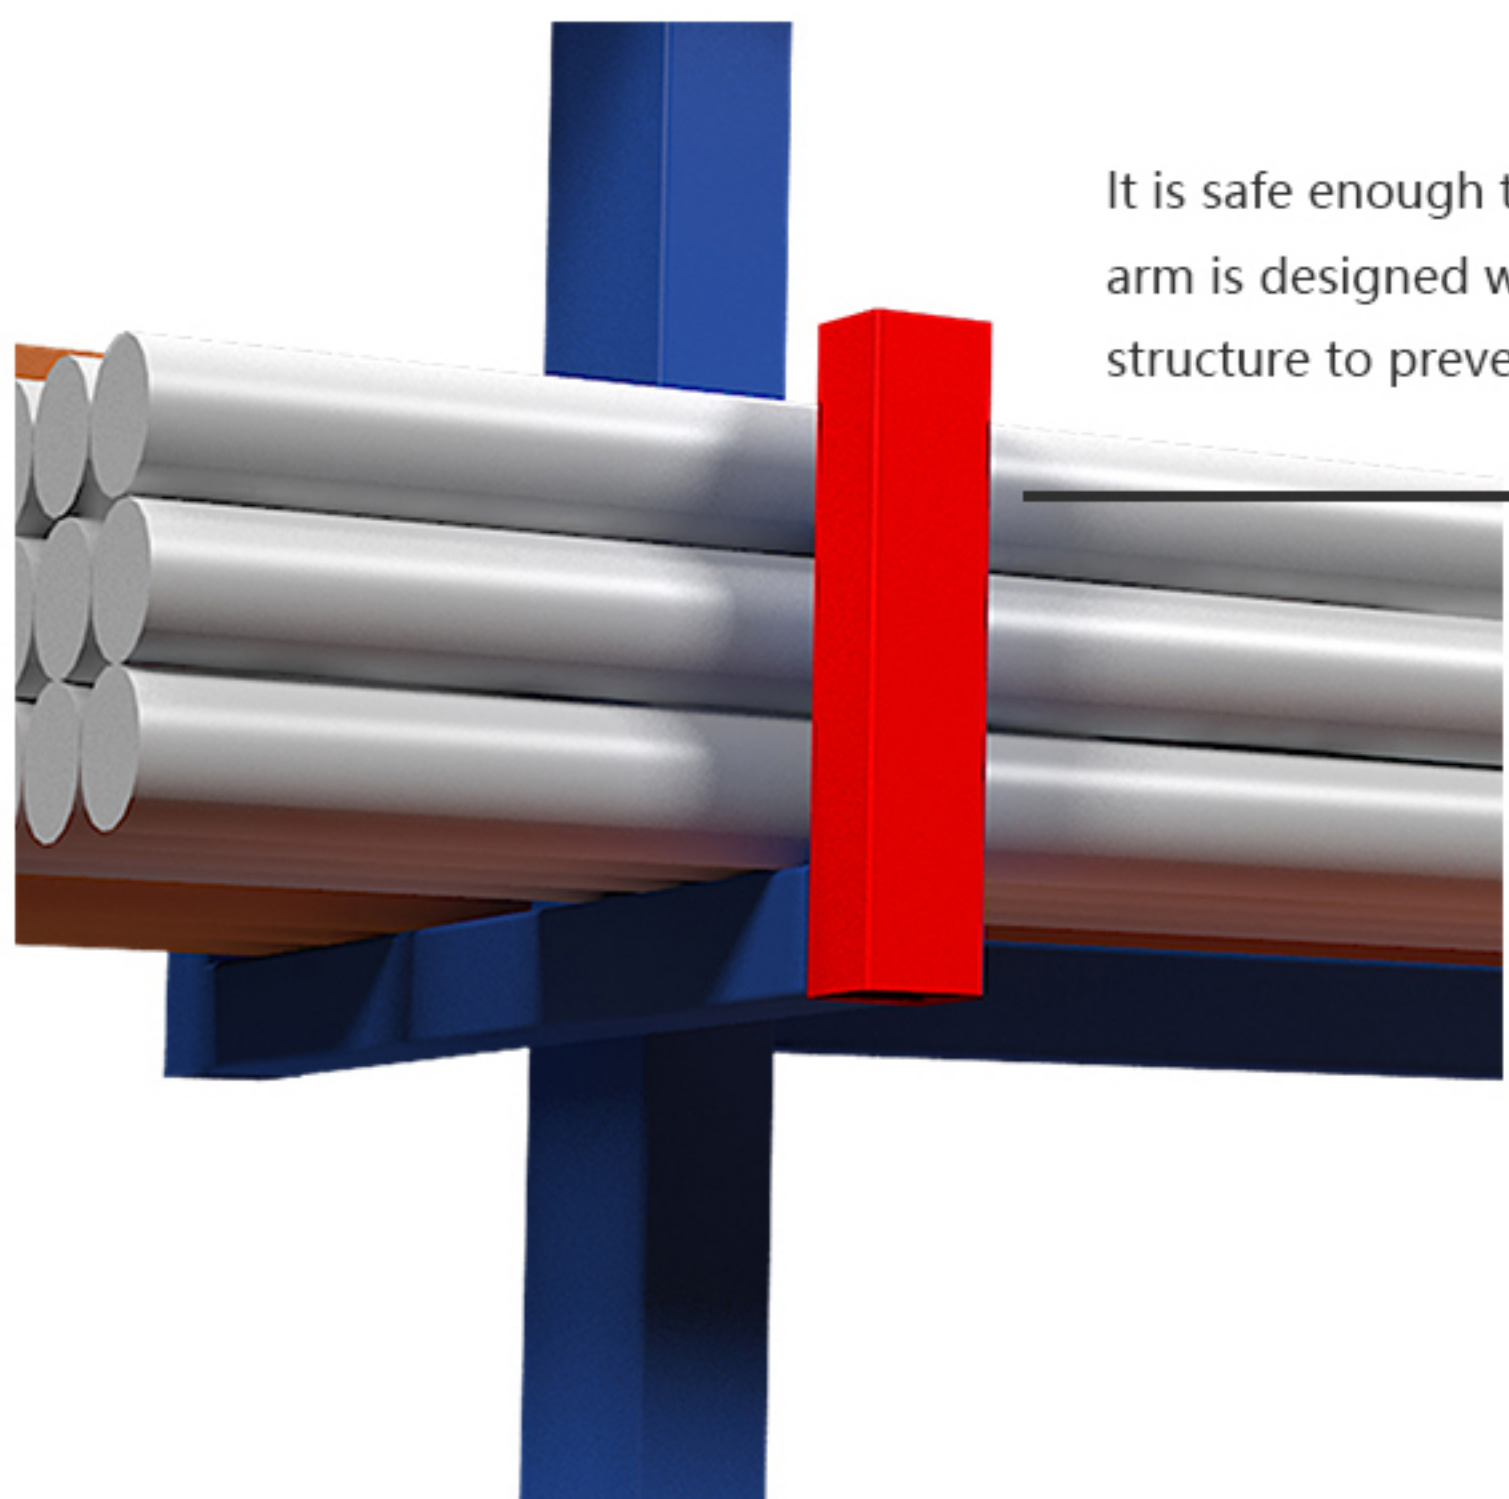

1

Considering the specific needs of work scenarios, the height of the product is close to the height of adults, so you can access different lengths of items flexibly

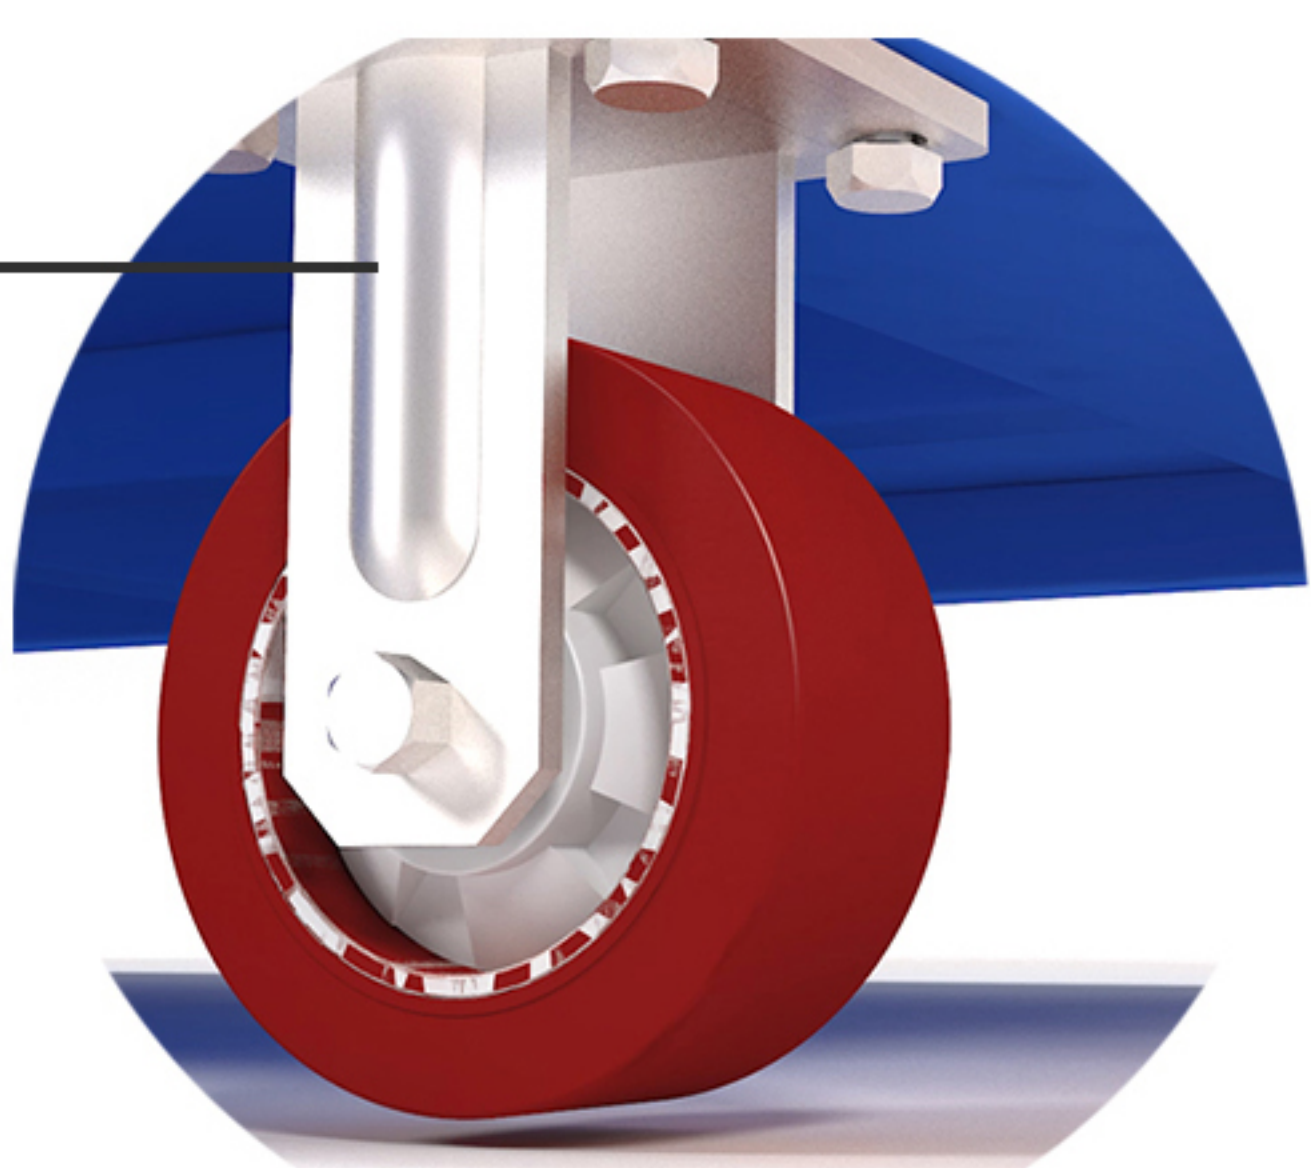

2

It is safe enough that each cantilever arm is designed with a blocking structure to prevent falling.

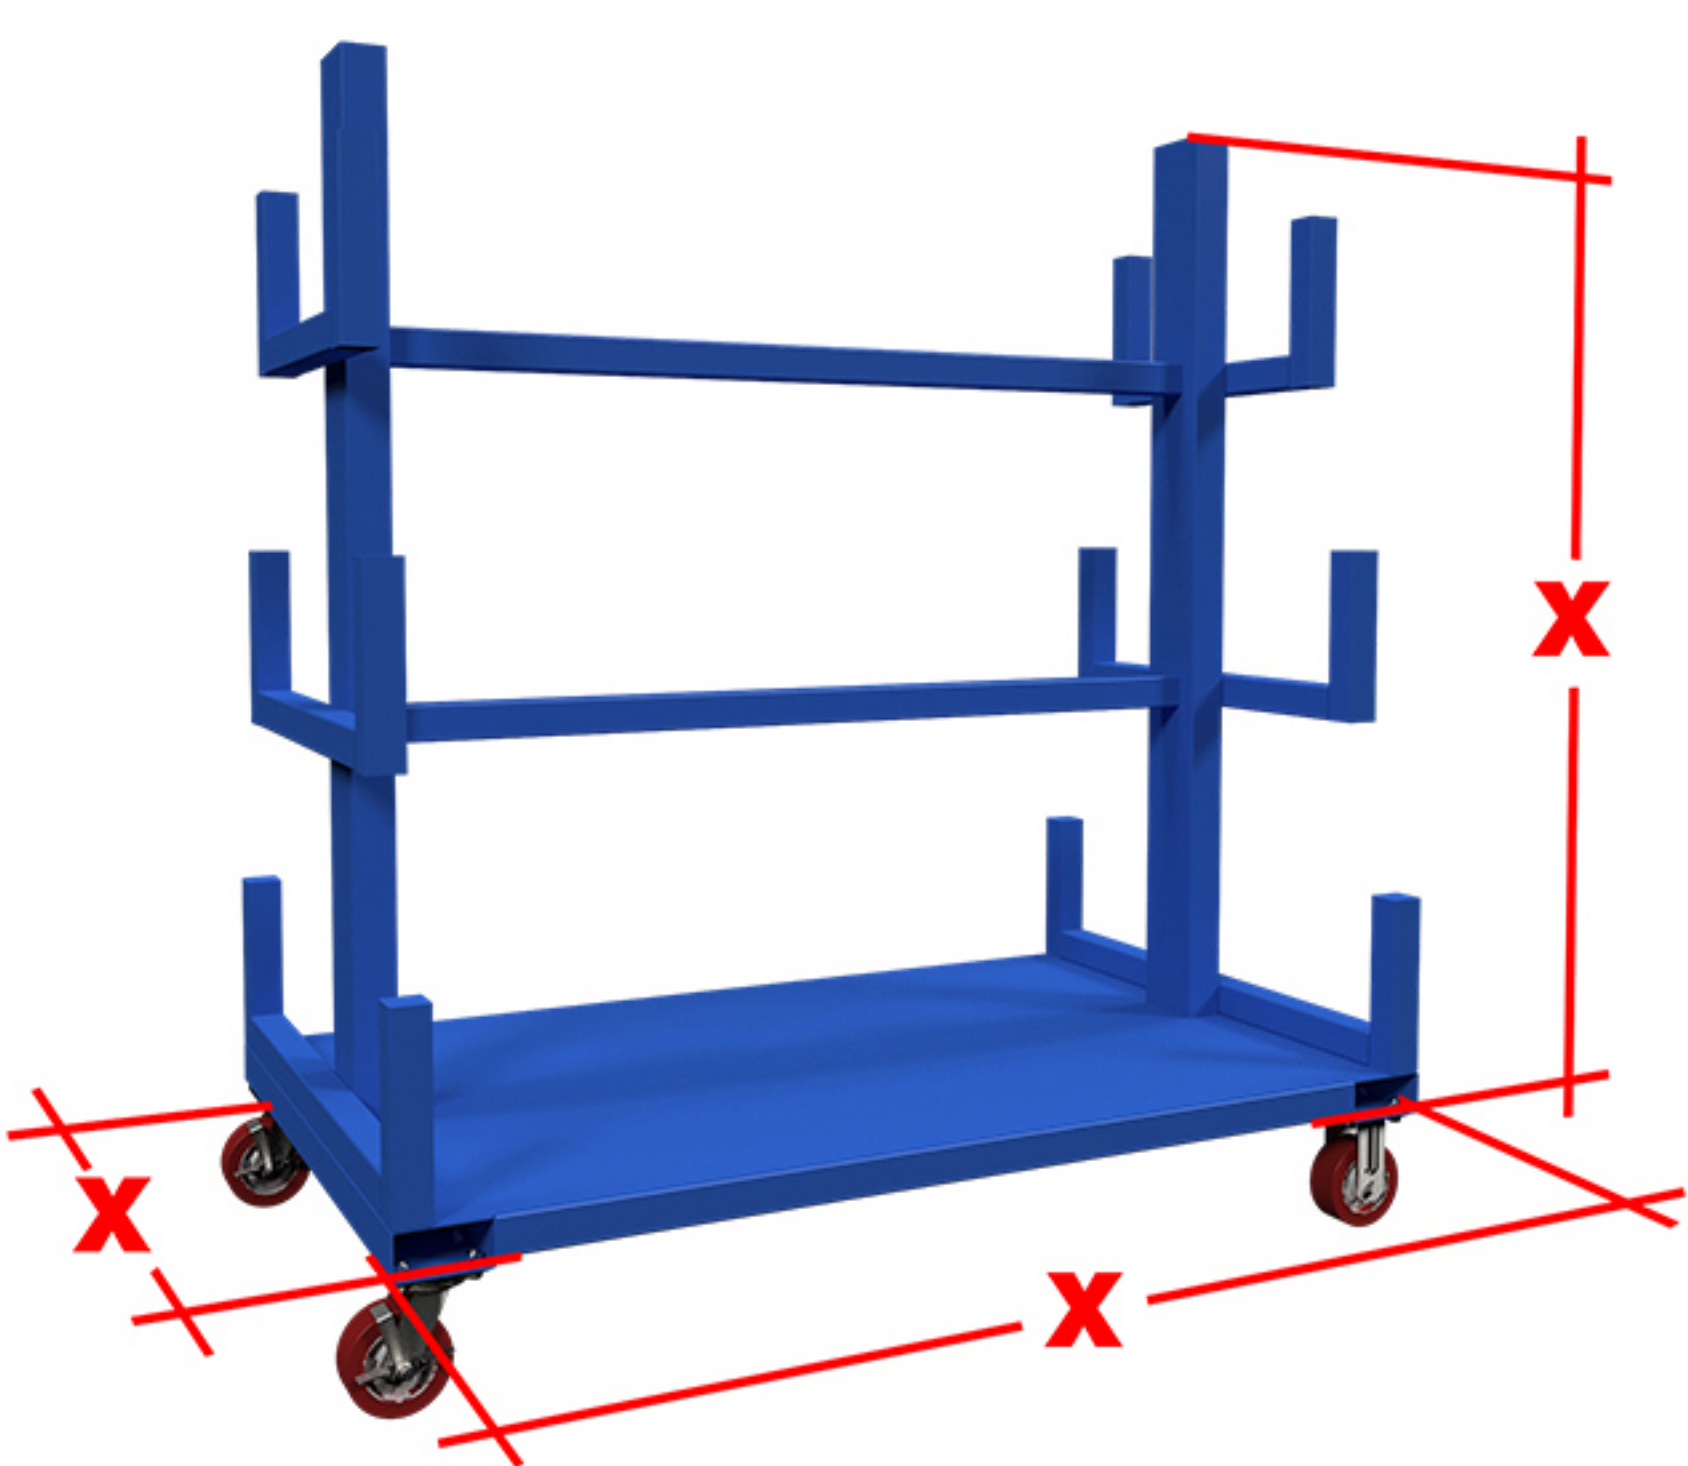

3

It is flexible enough to easily fix the cantilever rack close to your work area to improve efficiency

4

Product sizes can be customized upon request.

Product delivery method

We offer standardized products that are designed for easy installation. Therefore, customers can install them themselves.
