

PLUGGABLE PIPE RACKS

Dpirack is a product that is designed to handle the entire process of picking up, transferring and temporarily forming a three-dimensional storage unit with just need a single pipe rack. We have designed the product with your various applications in mind, such as forklift use, so it can be easily transferred by forklift. You can also apply temporary storage, when not in use, it can be folded and stored, as compared to the small space is not suitable for forklift movement scenario, we also fully consider the product's multiple applications, we support mobile customization, to ensure that in the small space range, we can still achieve flexible transfer.

DPIRACK

Meet the pipe rack storage for receiving, transferring, and temporarily forming three-dimensional storage units

With forklifts, they can be stacked on top of each other, forming a three-dimensional storage capacity and improving space utilization.

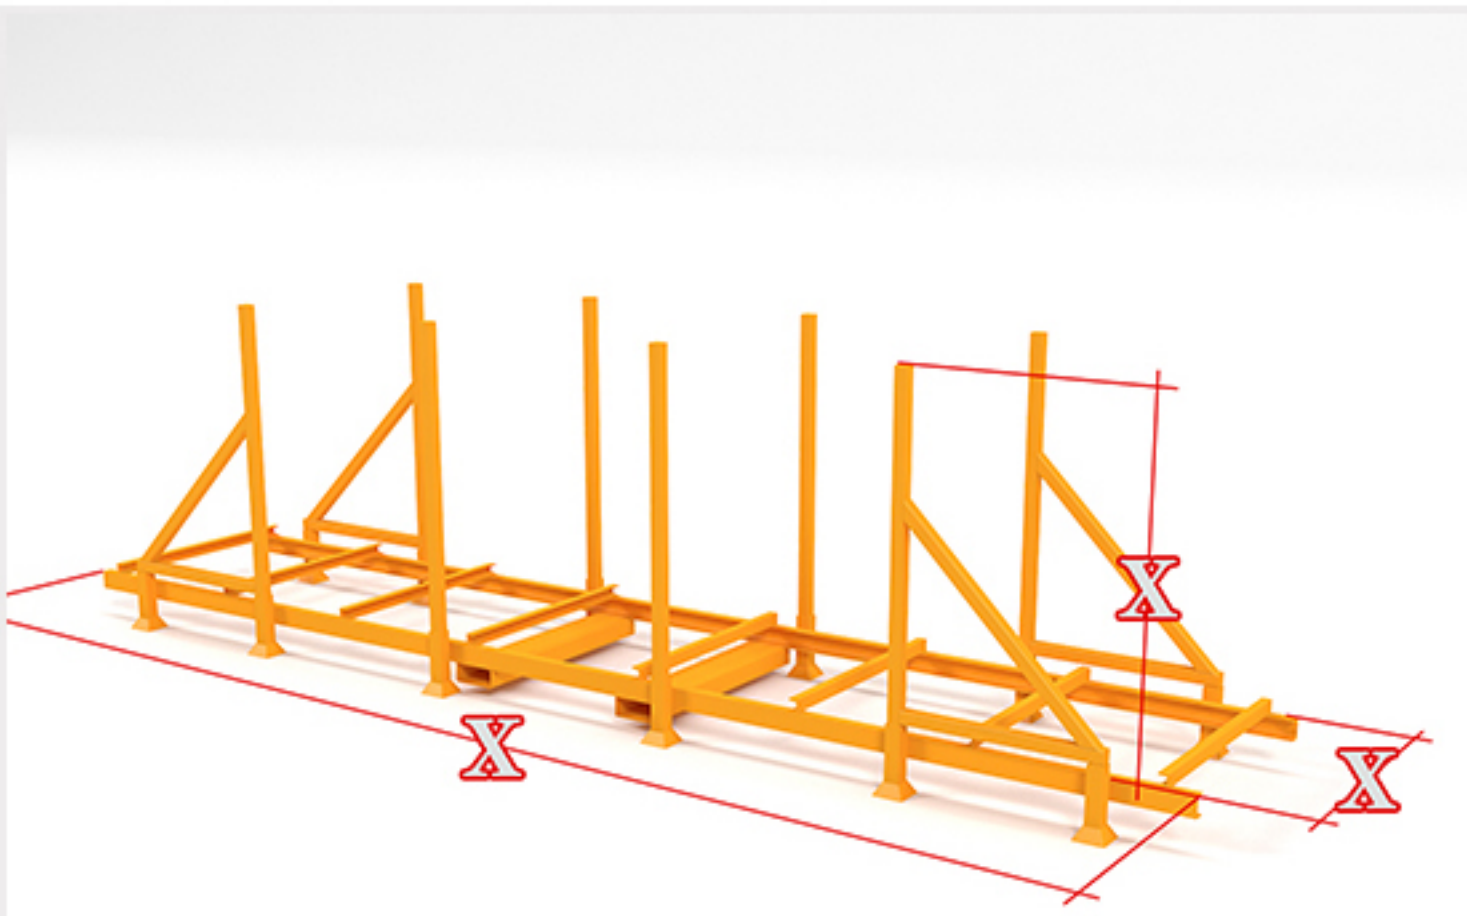

The goods can be directly placed on the smart cohesive rack, which is convenient for forklift handling and does not need to be used with additional pallets.

Column can be dismantled flexibly to save space and facilitate storage and transportation.

Add the additional casters, which can be moved without the need for a forklift.

Customizable according to user requirements.
