

VERTICAL SHEET METAL RACK

Aplarack is a vertical sheet storage rack that is the best choice for processing metal sheet products which require visible sorting and picking of different panel styles. It allows you to sort each group of panels visually, using the drawer structure design principle. You can pull out and place the sheets you need directly. The drawers are designed with a fixed structure to ensure that your panels do not shift. Storing or extracting the sheets you need will save you time and reduce your costs. Also the top supports stacking of horizontal sheet racks for easy three-dimensional storage of your entire sheets.

APLARACK

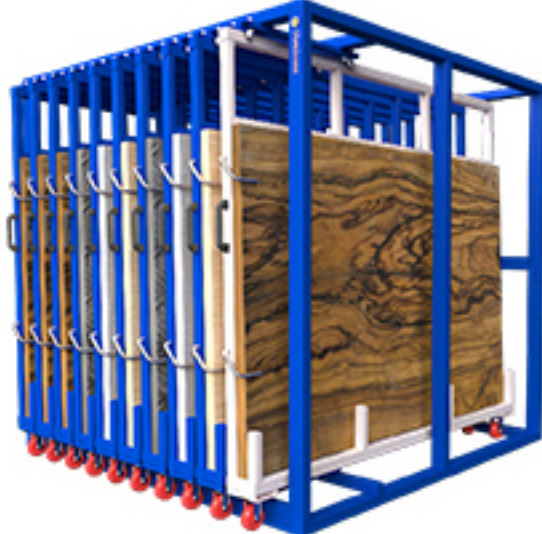

Intuitive category access to the metal sheets products you are processing

Suitable for storing various types of sheets such as metal, wood and plastic.

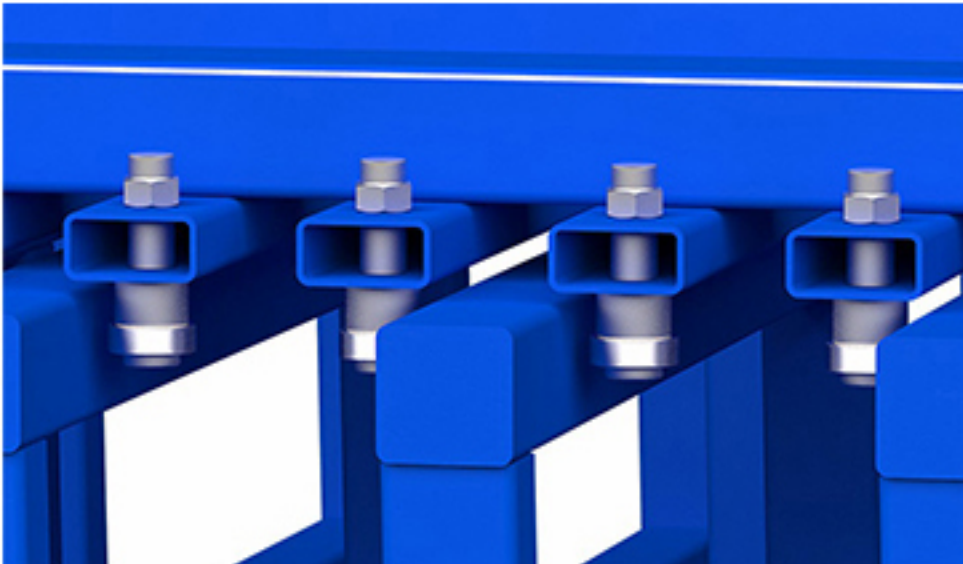

Multiple pull-out storage units are provided. Independent storage of sheets in each unit to prevent them from scratching each other.scratching each other.

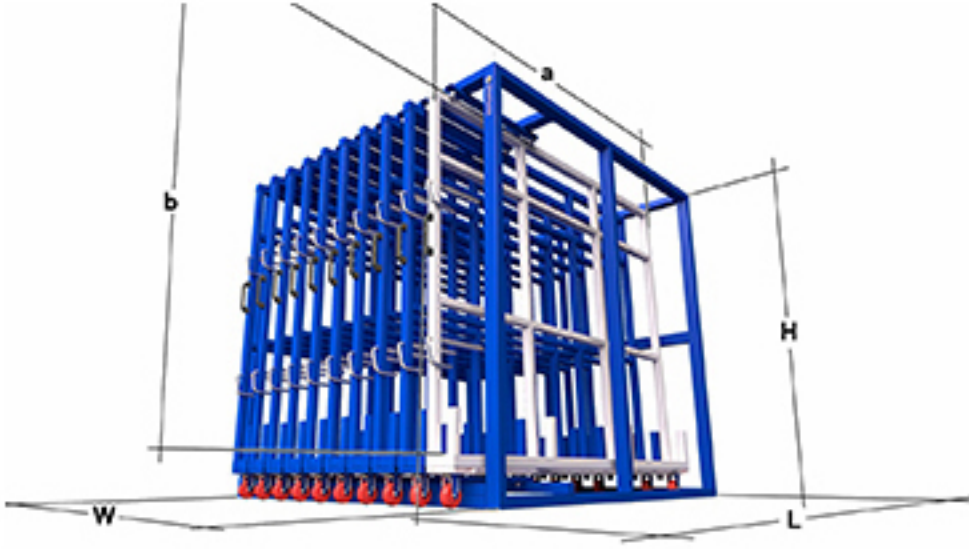

Dense storage modes for improved space utilization.

Casters under each drawer for easy pulling out and pushing back.

The main frame is equipped with rolling guides to prevent derailment and collision.

Customized solutions can be provided according to customer needs.
