

VERTICAL STORAGE RACK

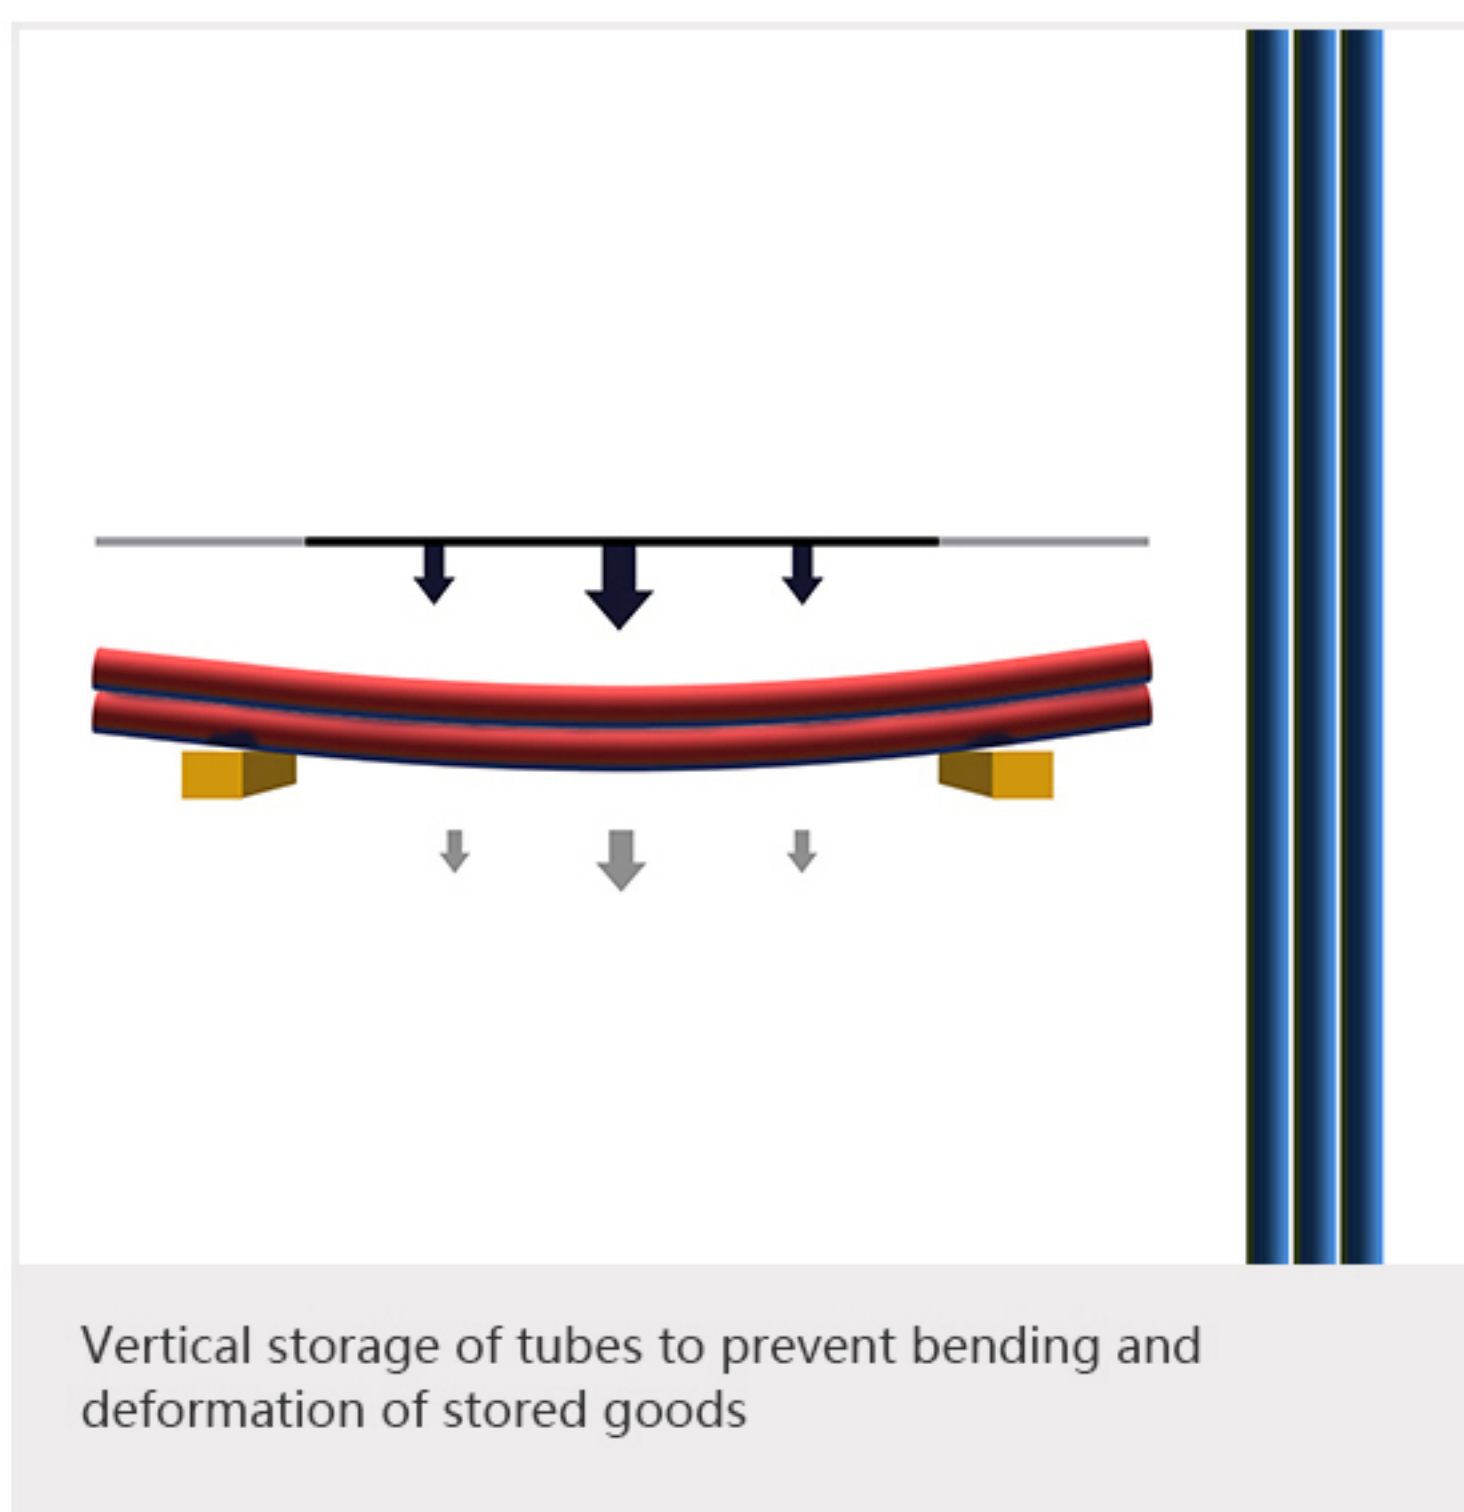

choice if you have long and soft metal pipe materials that need to be placed manually. How to ensure that your materials are properly sorted and stored in large quantities and not easily bent? Our vertical pipe rack is your best choice. The A-frame structure with multiple support sections to evenly distribute the stress area, multiple divisions and anti-tipping structure. It is easy to separate and classify the tubes, the tubes are stored diagonally on the beam. It can be installed on site, and the whole structure is assembled for easy transportation.

VPRACK

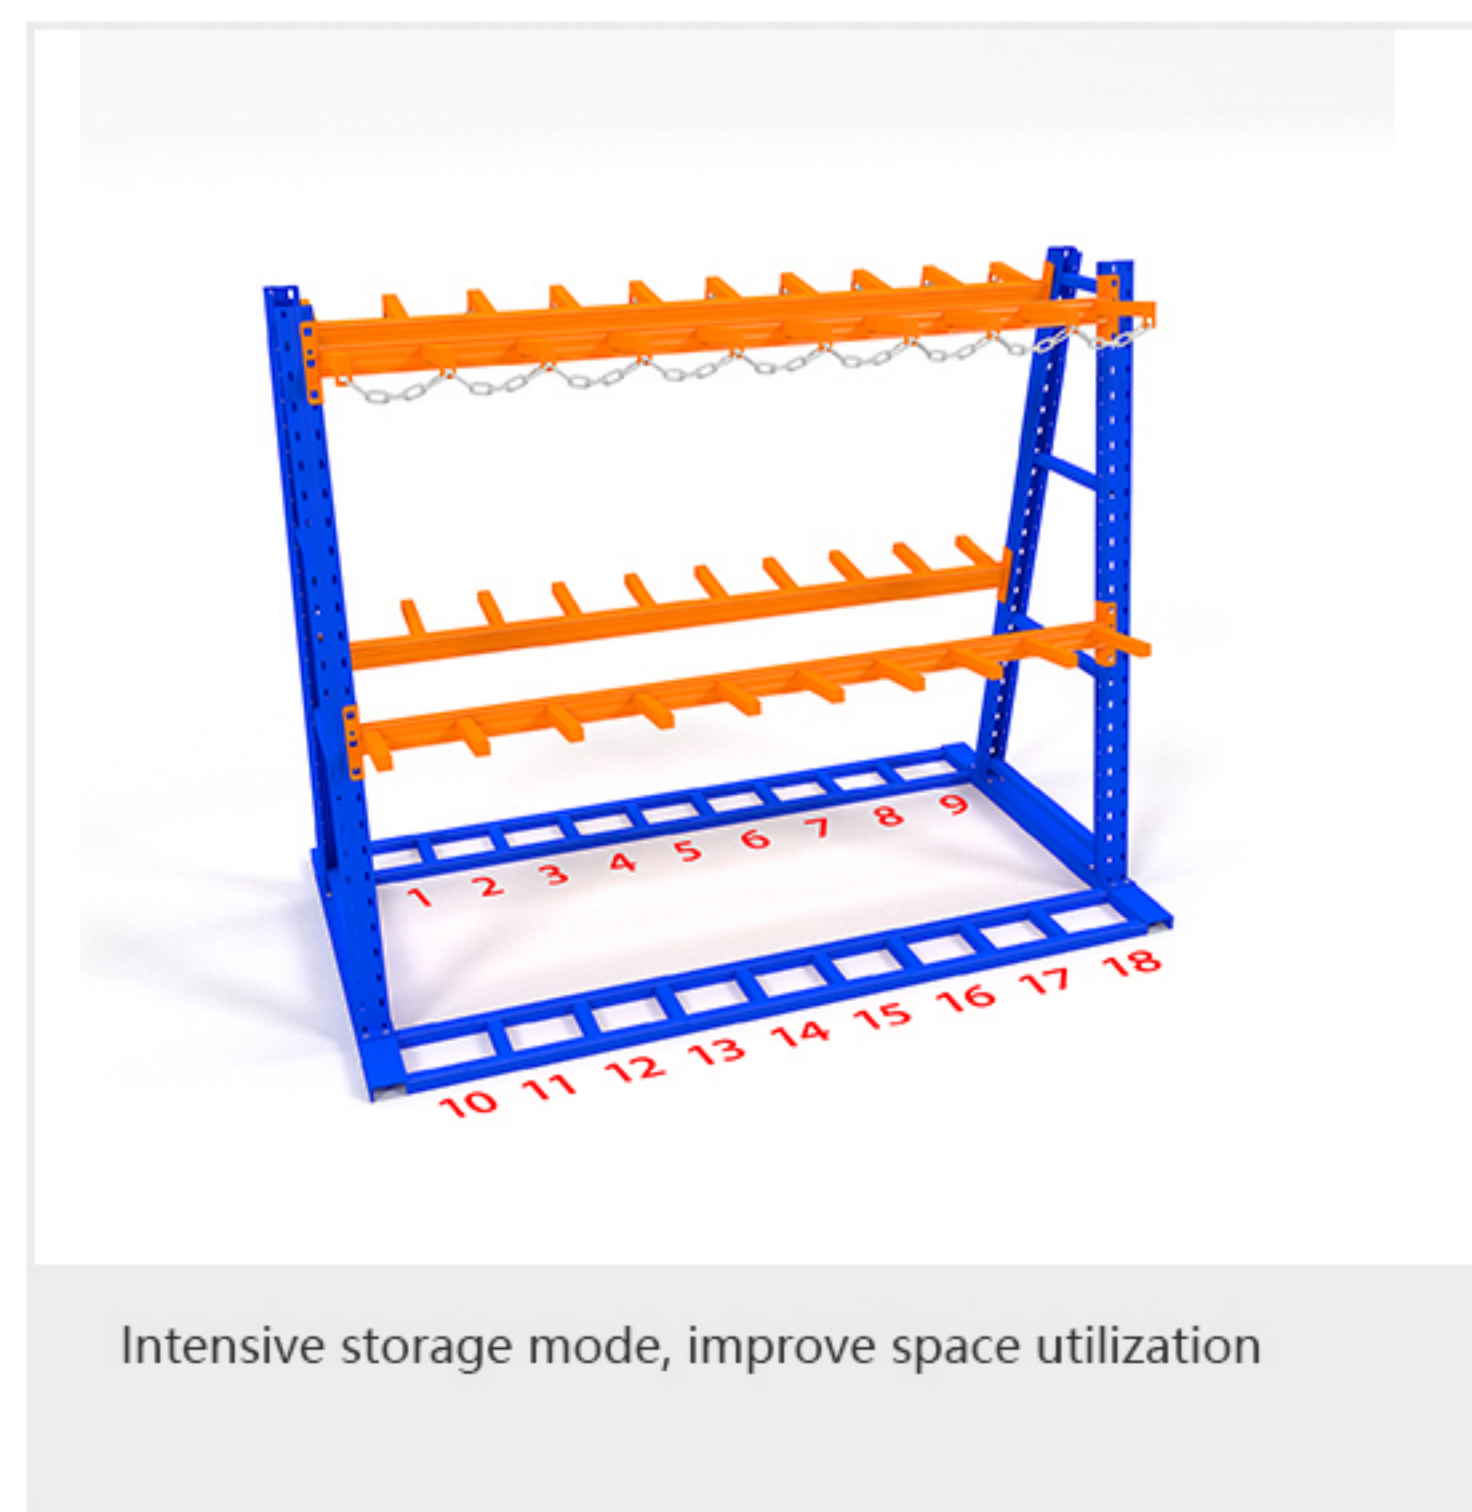

Tube storage racks protect your tubes from deformation

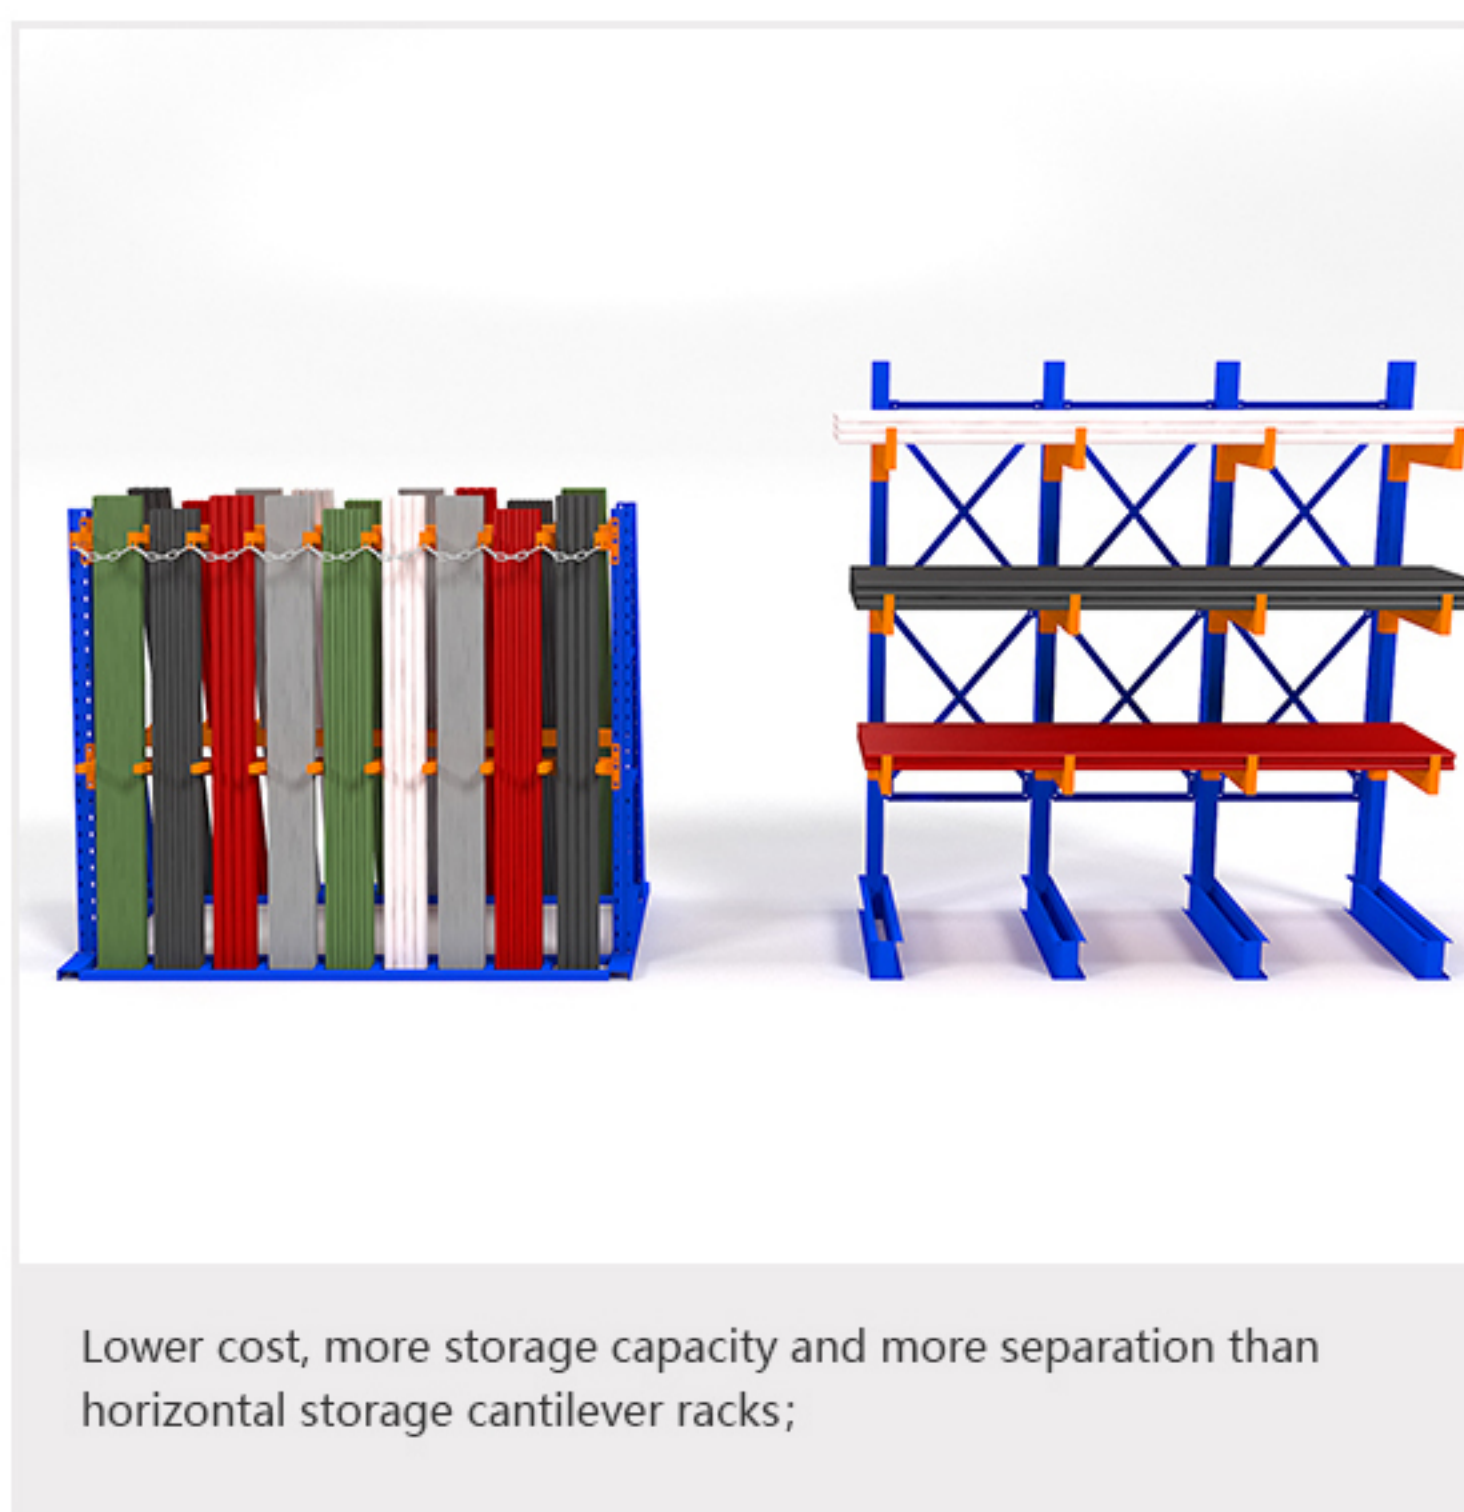

Focuses on manually picking up and protecting long, bendable tubes

Vertical storage of tubes to prevent bending and deformation of stored goods

Intensive storage mode, improve space utilization

Lower cost, more storage capacity and more separation than horizontal storage cantilever racks;

Equipped with interceptor chain to prevent cargo from tipping;

Product parameters table

Product size	2500*1400*2000 9*2grid
Static loading	3000kg
Suitable pipe length	≤3500mm
self-weight	154kg
